

July 2026

Trafigura Foundation

DIGITAL PERFORMANCE REPORT

Reporting period · July 2026

Prepared for · Trafigura Foundation

Report date · Early August 2026

Goal of this report

This monthly report tells the story of how trafigurafoundation.org performed in July – and what we will prioritise next.

We focus on four questions:

- **What did we deliver?** – SEO and site preparation underway
- **How did people respond?** – search visibility, visits, and engagement
- **Where does the site stand technically?** – speed and crawl health
- **What comes next?** – priorities for August

July was a **steady summer month** for traffic, with search still strongly brand-led. Behind the scenes, work continues on performance and technical SEO foundations for the weeks ahead.

Work completed

Delivery · July 2026

July focused on **audit, planning, and content foundations** ahead of a larger technical delivery planned for August.

SEO & site foundations

- Full sitemap / meta audit underway across indexed URLs
- Information architecture review: hubs vs CPT archives, crawl hygiene
- Preparation for unique Yoast titles and descriptions sitewide
- Identification of technical blockers (slow mobile LCP, theme SEO gaps)

Reporting & analytics

- Looker Studio performance dashboard in active use for GSC + GA4
- Monitoring of brand vs non-brand search demand

July was a setup month: understand performance, lock priorities, and prepare the August technical pass – starting with homepage speed and on-page SEO.

02

How people find Trafigura Foundation

Google Search Console · July 2026 vs June 2026

MEASURE	JULY	JUNE (APPROX.)	Δ MOM
Clicks from Google	645	690	-6.5%
Times shown in search	56,800	66,700	-14.9%
Click-through rate	1.1%	1.0%	+9.8%
Average position	7.7	~8.4	Improved

Compared to July 2025 (same month last year)

MEASURE	JULY 2026	Δ YOY
Clicks from Google	645	-36.9%
Times shown in search	56,800	-14.9%
Click-through rate	1.1%	-29.1%
Average position	7.7	Improved

Brand vs non-brand

TYPE	CLICKS	IMPRESSIONS	CTR	POSITION
Brand	305	25,462	1.2%	6.83
Non-brand	48	5,040	0.95%	10.72

Top searches

SEARCH TERM	CLICKS	WHAT IT TELLS US
trafigura foundation	265	Core brand – very strong CTR
fondation trafigura	17	French-language brand
trafigura	16	Broad brand (huge impressions, few clicks)
dario soto abril	10	People / leadership search
james josling	6	People search
new energy nexus	2	Partner discovery

Top pages from Google

PAGE	CLICKS	ROLE
Homepage	343	Main entry – ~53% of search clicks
Who We Are	102	Mission / corporate interest
Annual Report 2025 PDF	21	Report downloads from search
Contact	14	Direct outreach intent
Blue carbon partnership news	14	Programme content ranking

WHAT THIS MEANS

July search was **slightly softer than June** on clicks and impressions (typical summer pattern), but CTR rose and average position improved to **7.7**. Demand stayed brand-heavy (305 brand vs 48 non-brand clicks).

Year-on-year: clicks (–37%) and CTR (–29%) are clearly softer than July 2025, even though position looks stronger. MoM alone would understate the gap – YoY is the signal that content discovery and non-brand visibility need sustained work into autumn.

03

What visitors do on the site

Google Analytics 4 · July 2026 vs June 2026

MEASURE	JULY	Δ MOM
Total visits (sessions)	2,600	-21.8%
Visits from Google search	924	-5.5%
Engagement rate	44.8%	+1.7%
Engaged visits	1,200	-20.4%
Views	4,100	-23.2%
Avg. session duration	3:50	+27.4%

Compared to July 2025 (same month last year)

MEASURE	JULY 2026	Δ YOY
Total visits (sessions)	2,600	-68.3%
Visits from Google search	924	-48.9%
Engagement rate	44.8%	-24.7%
Engaged visits	1,200	-76.2%
Views	4,100	-69.9%
Avg. session duration	3:50	-14.3%

WHAT THIS MEANS

Sessions and views fell versus June, while **time on site rose** and engagement rate held around 45%. That often means fewer but more attentive visits in a quieter period. Organic search still contributed about **one third** of sessions (924 of 2,600).

Year-on-year: July 2026 is much softer than July 2025 on sessions and views. Treat large YoY gaps carefully (tracking changes, one-off campaigns last year, or measurement differences can inflate the drop) – but the direction is clear enough to keep recovery and content discovery as priorities, not only month-to-month seasonality.

04

Answer engines & AI visibility

AEO · July 2026

Foundations for answer-engine readiness are being put in place. Formal monthly AI spot-checks will begin in August.

Status in July

ITEM	STATUS
Unique page titles and descriptions (full sitemap)	In progress – planned for August
AI crawler guide (llms.txt)	Planned
Structured data (Yeast baseline)	Present on main templates
FAQ + FAQPage	Not yet
Formal 3-prompt AI spot-check	Planned for August

WHAT THIS MEANS

From August we will track three fixed questions every month (who you are, what you fund, areas of work). That gives a clear baseline once metas, FAQs, and pillar copy are fully in place.

05

Site speed & technical health

Homepage lab baseline · current state

Visitors in July experienced the homepage in its current, pre-optimisation state. Lab results below set the baseline for the August speed overhaul.

MEASURE	CURRENT BASELINE
Mobile performance score	60 / 100
Time to main content (LCP)	8.7 seconds
Mobile SEO (Lighthouse)	92 / 100
Mobile accessibility	85 / 100

WHAT THIS MEANS

An ~9 second mobile wait is well outside Google’s “good” range and is the top technical priority for August.

Summary & conclusion

July was a quieter traffic month with solid brand search demand and clear technical debt on homepage speed – already queued for August.

645

GOOGLE CLICKS

-6.5% vs June

7.7AVG. SEARCH
POSITION

improved vs June

2.6K

SESSIONS

-21.8% vs June

924ORGANIC
SESSIONS

-5.5% vs June

In short

- **Search:** 645 clicks; CTR up; position 7.7; still brand-led
- **Visits:** sessions down vs June; longer sessions when people stayed
- **Technical:** mobile LCP still ~8.7s – priority for August
- **AEO:** formal scoring starts in August

WHAT THIS MEANS

July confirmed seasonal softness and a strong brand core. The right next step is not to overreact to MoM dips – it is to fix speed and on-page SEO in August.

07

Plan for next month

August 2026

Priorities for August:

PRIORITY	ACTION	WHY IT MATTERS
High	Homepage speed / LCP overhaul	Mobile experience and Core Web Vitals
High	Unique Yoast titles & descriptions sitewide	Clearer Google & social snippets
High	Crawl / archive / share-URL fixes	Cleaner indexing and sharing
Medium	Strengthen hubs & internal links	Connect pillars, news, and partners
Medium	Formalise monthly reporting + AEO checks	Consistent performance tracking

WHAT THIS MEANS

August will focus on visitor-facing speed, sitewide on-page SEO, and cleaner indexing – then we continue with content discovery and AEO through autumn.

Thank you

We look forward to continuing the work in August.
