

August 2026

Trafigura Foundation

DIGITAL PERFORMANCE REPORT

Reporting period · August 2026

Prepared for · Trafigura Foundation

Report date · 2 September 2026

Goal of this report

This monthly report tells the story of how trafigurafoundation.org performed in August – and what we did to strengthen it.

We focus on four questions:

- **What did we deliver?** – the work completed on the site
- **What went live?** – new stories and partner pages published
- **How did people respond?** – search visibility, visits, and how the Foundation appears in AI answers
- **What comes next?** – priorities for September

August was a **foundation-building month**: we prioritised site speed, clearer page information for Google, and a cleaner structure – so every visitor and every future piece of content starts from a stronger base.

Work completed

Delivery · August 2026

Site performance & technical SEO

- Homepage speed overhaul (mobile load time 8.7s → 2.0s)
- Self-hosted fonts; analytics deferred so the page loads first
- Fixed archive and redirect issues; cleaned junk URLs from search
- Image descriptions added site-wide; social sharing links corrected
- Unique SEO titles and descriptions for all **114** indexed pages

Structure & linking

- Partner URL clean-up with redirects where slugs were simplified
- Stronger internal links on homepage and hub pages
- Hub and archive paths kept clean for Google and visitors

Reporting & process

- Performance dashboard updated (top searches, brand split, organic visits)
- Monthly reporting process established
- Sitemap baseline saved so we can track content changes every month

Most of August's effort was invisible to visitors – but they feel it as a faster homepage, clearer titles in Google, and pages that share correctly on LinkedIn and Facebook. This is the groundwork that future content and campaigns build on.

02

Content published

News & partner stories · August 2026

Alongside technical work, new partnership content went live – expanding the stories Google and visitors can discover.

News

STORY

Lasting access to safe water – India & Tanzania

Women-led water services – Northern Ghana

Conservation profitable for Amazon communities

Partner stories

PARTNER

Saha Global

Water For People

Instituto Juruá

Sitemap: 114 pages in total (8 core pages · 3 area pillars · 62 news · 41 partner stories). Tales of Resilience remains live but is currently hidden from Google search.

WHAT THIS MEANS

New pages create new ways for people to find the Foundation – especially when partner names are searched. Each publish should ship with a tailored title and description so Google and social networks show the right message from day one. That is a September priority for the newest URLs.

03

How people find Trafigura Foundation

Google Search Console · August 2026 vs July 2026

MEASURE	AUGUST	JULY (APPROX.)	Δ MOM
Clicks from Google	612	645	-5.1%
Times shown in search	50,934	56,800	-10.4%
Click-through rate	1.2%	1.1%	+5.9%
Average position	8.3	8.9	Improved

Compared to August 2025 (same month last year)

MEASURE	AUGUST 2026	Δ YOY
Clicks from Google	612	+1.2%
Times shown in search	50,934	-10.4%
Click-through rate	1.2%	+18.2%
Average position	8.3	Improved

Top searches

SEARCH TERM	CLICKS	WHAT IT TELLS US
trafigura foundation	201	Core brand – homepage and Who We Are working well
fondation trafigura	32	French-language brand demand
trafigura	19	Broad brand (high visibility, few clicks – normal)
new energy nexus	8	Partner name driving discovery
farringford foundation	7	Partner / related entity

Top pages from Google

PAGE	CLICKS	ROLE
Homepage	310	Main entry – 51% of all search clicks
Who We Are	96	Strong mission / corporate interest
New Energy Nexus partner story	15	Partner content ranking
Contact	12	Direct intent to reach the Foundation
Areas of Work	11	Pillar hub gaining visibility

WHAT THIS MEANS

Think of **impressions** as how often your site appeared in Google, and **clicks** as how many times someone visited. Fewer impressions in August likely reflects seasonal search behaviour – not a ranking problem. When you do appear, people click more often (CTR up 6% MoM and **+18% vs last August**) and average ranking improved.

Year-on-year: clicks are essentially flat (+1.2%) versus August 2025 – a healthier signal than the soft MoM dip alone. Most search clicks (259 of 612) still come from people already looking for Trafigura by name; non-brand discovery (40 clicks) is the longer-term growth lever.

04

What visitors do on the site

Google Analytics 4 • August 2026 vs July 2026

MEASURE	AUGUST	Δ MOM
Total visits (sessions)	2,700	+4.5%
Visits from Google search	917	-0.8%
Engagement rate	44.6%	Stable
Engaged visits	1,200	+4.0%

Compared to August 2025 (same month last year)

MEASURE	AUGUST 2026	Δ YOY
Total visits (sessions)	2,700	-3.2%
Visits from Google search	917	-8.9%
Engagement rate	44.6%	-17.1%
Engaged visits	1,200	-19.8%
Views	4,500	-12.1%
Avg. session duration	3:03	-32.3%

WHAT THIS MEANS

Overall visits rose slightly MoM (+4.5%) even though Google search visits were flat – usually meaning more people arrived via direct links, email, or referrals. Organic search still represents about **one third of all visits** (917 of 2,700).

Year-on-year: sessions are nearly flat (–3%), while engagement rate and time on site are softer than August 2025. That is useful context: MoM looked stable-to-up, but the longer view says we should keep improving content depth and discovery – not only celebrate summer MoM noise. Notable movers MoM: Partners Stories hub (+33%), The HALO Trust, Who We Are (+16%).

05

Answer engines & AI visibility

AEO · Monthly spot-check · August 2026

Journalists, partners, and researchers increasingly ask AI tools rather than scrolling search results. We want the Foundation described **correctly** and linked to **your** pages – not outdated copy or third-party summaries.

What we shipped

ITEM	STATUS
Unique page titles and descriptions (114 pages)	Done
AI crawler guide (llms.txt)	Done
Structured data on main page types	Done
FAQ section with schema	Planned
Answer-first intro blocks on pillar pages	Planned

AI spot-check — score 6 / 6

QUESTION	CITES YOUR SITE?	ACCURATE?
What is the Trafigura Foundation?	Yes	Yes
What does the Trafigura Foundation fund?	Yes	Yes
What are the Foundation's areas of work?	Yes	Yes

WHAT THIS MEANS

The core story is landing correctly today – climate adaptation philanthropy, catalytic funding in vulnerable regions, and the three pillars (Sustainable Livelihoods, Prepared Communities, Thriving Nature). Next: FAQ content on high-traffic pages so AI tools can pull short, quotable answers. We repeat this check every month.

06

Site speed & technical health

Homepage lab test · Before ~12 Aug vs after 14 Aug

MEASURE	BEFORE	AFTER
Mobile performance score	60 / 100	99 / 100
Time to main content	8.7 seconds	2.0 seconds
SEO score (mobile)	92 / 100	100 / 100
Accessibility score	85 / 100	96 / 100
Desktop performance	~67 / 100	100 / 100

AUGUST HIGHLIGHT

The homepage now loads in about **two seconds** on mobile instead of nearly nine – a major improvement for every visitor, especially on phones and in regions with slower connections.

WHAT THIS MEANS

This is August's **standout technical result**. A nine-second wait is slow enough that many people leave; two seconds meets Google's "good" threshold and delivers a better first impression. We got there by showing a lightweight image first (instead of a large video on mobile), hosting fonts locally, and loading analytics only after the page is usable.

Summary & conclusion

August strengthened the base of the site while traffic stayed healthy for a quieter summer month.

612

GOOGLE CLICKS

-5.1% vs July

8.3AVG. SEARCH
POSITION

improved vs 8.9

In short

- **Speed:** mobile homepage transformed (60 → 99 performance; LCP 8.7s → 2.0s)
- **Search:** clicks dipped slightly (-5%) as expected in August; position and CTR improved
- **Visits:** sessions up +4.5%; about one third from Google search
- **AI visibility:** Foundation described accurately in our monthly spot-check (6 / 6)
- **Content:** new water and partnership stories live; sitemap stable at 114 pages

WHAT THIS MEANS

The technical foundations are in place. September is about finishing polish (social previews, new-page descriptions) and growing discovery beyond brand searches.

08

Plan for next month

September 2026

PRIORITY	ACTION	WHY IT MATTERS
High	Clear outdated Facebook preview text on key pages	LinkedIn / Facebook shares show current messaging
High	Tailored descriptions for new August / September content	Prevents generic boilerplate reappearing
Medium	Internal links from news to partner pages	Connects related stories for Google and visitors
Medium	Tales of Resilience – title fix + indexability decision	Aligns campaign URL with search strategy
Medium	FAQ section + monthly AI spot-check	Strengthens answer-engine presence

WHAT THIS MEANS

September shifts from “build the base” to “make every new page and every share look right” – and start growing non-brand discovery through clearer answers and stronger links between news and partners.

Thank you

We look forward to continuing the work in September.
